- 17/03194 T1 – Beech – 1 x mature Beech to section fell due to a large open wound approximately 1 metre from ground level. It has a large amount of decay running in to the centre of the tree along with a large v union with included bark, creating a high potential for failure. (T2 Sycamore – TPO – To remove deadwood only) at The Pillars, 32 Westgate, Hornsea
Support the Tree Officer's recommendations
- 17/03195 T1 – Weeping Willow – to pollard due to the tree overhanging the neighbouring boundary heavily, the canopy causing heavy shade over the property. The pollard is necessary at this stage so the tree can be maintained in the future and kept to a manageable size for the location at The Dingle, Seaton Road, Hornsea
Support the Tree Officer's recommendations
- 17/02813 T1 Leylandii fell, T2 Cherry, formative pruning once Leylandii has been felled at Eastgate House, 36 Eastgate, Hornsea

Support the Tree Officer's recommendations
- 17/03055 G1, T1, T2: T1 Corsican Pine to crown lift the limbs, pruning them back to the main stem, which are overhanging the property by up to 9m from ground level. This is due to excessive shade and potential damage to the property. T2 Corsican Pine to crown lift the limbs, pruning them back to the main stem, which is overhanging the property by up to 9m from ground level. This is due to excessive shade and potential damage to the property. T3 Silver Birch to crown lift by 5m, reduction of main limbs

overhanging the neighbouring property by 30% due to excessive shade and potential damage to the property. T4 Sycamore to crown lift by 5m as the boundary overhang the road affecting larger vehicles. The branches also overhang the neighbouring property and the crown lift would allow more light through. To remove dead and damaged limbs at Spring Cottage, Football Green, Hornsea
